-

ABOUT

EMPATHIC ENGINEERING

EMILY HONOR HUBBARD, CEO

TEACHING PHILOSOPHY

Teams in technical environments frequently face challenges with efficient communication that impact productivity and project success.

Empathic Engineering offers tools to streamline operations and promote collaboration for your team, resulting in improved project outcomes.

Emily is the Chief Empathy Officer (CEO). Her work applies experience from several international engineering roles, including Ford Motor Company in Mexico.

Now, she shares skills through experience-based learning that optimize well-being for analytical thinkers.

3-DAY BREAKTHROUGH

An Engaged Team Stays and Succeeds

The 3-Day Breakthrough Program helps teams at all levels build stronger connections, improve communication, and create a workplace culture where everyone feels valued. This program equips teams with the tools to address root causes of disengagement, improve morale, and reduce costly turnover.

1 Understanding Engagement

- Interview employees and observe meetings to help define costs of turnover and disengagement.

2 Breaking Communication Barriers

- Practice active listening and how to ask meaningful questions to address misunderstandings and workplace conflict constructively.

3 Designing Long-Term Success

- Establish accountability systems to ensure the team sustains positive changes, celebrate progress, and align on next steps.
